To Whom It May Concern,

I am writing to make you aware of the noise issue when living near a wind energy site. We have experienced outdoor noise that is sometimes deafening due to weather conditions. We have been kept awake and awakened from sleep inside the home from a constant droning sound. Keep in mind these conditions are not intermittent, but constant. When there is no let up in an annoyance it soon becomes intolerable. How can one afford to walk away from a home both financially and sentiment wise? How can one continue to live with noise, aggregation, frustration, sorrow, loss of quality of life, and more.

There needs to be limits on future Projects and there needs to be some sort of settlement/operating guidelines for Project neighbors that are dealing in the here and now of problems posed by these Projects.
